

# VALLEY STONESCAPES

WELCOME!

Valley Stonescapes, LLC. specializes in designing and installing stone for residential and commercial applications.

Each design contains sustainable techniques to control erosion and other natural disasters, increasing durability in the product we produce. We combine creativity, craftsmanship, experience, and knowledge to produce a well crafted stone landscape for each client. A few of our areas of expertise include stone patios, walls, walkways, and staircases.

Taylor Bryan, owner and head stone mason of Valley Stonescapes, LLC., founded the company in the spring of 2007. Since that time, we have gained an impressive reputation for outstanding service, innovation, and professionalism.

Examples of a stonescaped patio, walkway, and a dry-laid stone wall.

## STONE WALLS

Stone walls can be created with any type of stone. Walls are constructed with experience and craftsmanship using dry-laid techniques. The dry-laid techniques take creativity, skill, and experience. Walls created with this technique resemble forms of ancient art.

## STONESCAPES

Stonescapes are defined as stone landscapes.

We combine all of our experience and artistic skill to create a stone landscape that best suits your yard. For example, we can transform an old concrete staircase into a beautiful flagstone staircase, shown here.

## SPECIAL PROJECTS

Special Projects are our creations of our clients' ideas and experiences. As shown in the photo at left, any type of material can be used to create a form of stone work. Our portfolio includes water features, a stone patio containing a medicine wheel, a stone root cellar made from the stone found on the farm property, a patio made of recycled man-hole covers, and many more.

## MASONRY

Masonry can be added to stone work increasing the work's life, durability, and form. We've installed basic forms of block, brick, concrete, and stucco.

We combine art  
with stone to  
produce dreams...
